

ANY PLATFORM · ANY DIRECTION

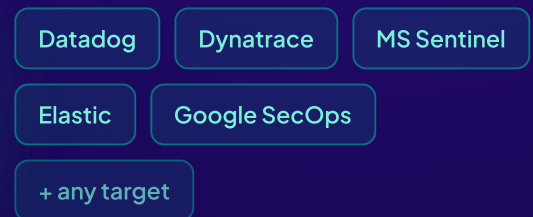

Migrate *anything* to anywhere.

Neuwave Migrations is an agentic-AI platform that automates SIEM, observability and APM migrations — translating dashboards, alerts, queries, parsers and schemas between **any source and any target**. Production-ready content in weeks, not years.

Discover → Translate → Validate → Cutover.

01 PHASE	→ 02 PHASE	→ 03 PHASE	→ 04 PHASE
Discovery & Assessment	Translation & Mapping	Validation & Testing	Cutover & Orchestration
<ul style="list-style-type: none">• Inventories dashboards, alerts & queries• Maps dependencies & risk• Generates a plan with effort estimate	<ul style="list-style-type: none">• Translates queries — SPL→DQL, NRQL→PromQL• Converts panels & schemas• Self-corrects until quality is met	<ul style="list-style-type: none">• Runs against a mock server — no live data• Compares output fidelity, source vs target• Flags low-confidence items	<ul style="list-style-type: none">• Deploys validated content to the target• Go-live in a set cutover window• Rollback maintained throughout

WHY NEUWAVE

NOT ANOTHER POINT-TO-POINT TOOL

01 True any-to-any engine One AI platform handles every source-target combination. One product. Every migration.	02 AI self-correction loop Audits its own output against SME-curated rules and self-corrects until it passes — >95% autonomous.	03 Outcome-based pricing Billed on successful migration of content, not time-and-materials. Clear ROI from day one.

CUSTOMER SUCCESS

GLOBAL FINANCIAL SERVICES ENTERPRISE

Accelerating Enterprise Observability with AI-Driven Migration to Dynatrace

A global **financial services enterprise** faced spiralling costs from a fragmented Splunk estate. Neuwave Agentic AI automated SPL → **DQL** translation and rebuilt every dashboard as Dynatrace JSON — expert-validated.

AI TRANSLATION ENGINE

SPL → DQL
